

HIV DART™ 2010

FRONTIERS IN DRUG DEVELOPMENT
FOR ANTIRETROVIRAL THERAPIES

December 7-10, 2010
Hilton Los Cabos - Mexico

iHola!

We are pleased to offer you the opportunity to participate in HIV DART™ 2010, the 15th meeting in the DART series, which began in 1995. HIV DART 2010 was designed to interest physicians, clinicians, scientists and clinical researchers in the HIV/co-infection arena. The educational objectives of the meeting are as follows:

- Understand the role of viral targets in the drug discovery and development process
- Identify novel therapeutic agents and viral targets for retroviruses
- Develop improved strategies to reduce or eliminate drug-resistance and toxicity
- Understand reservoirs and viral persistence towards HIV eradication
- Develop microbicides and other preventative approaches
- Understand the consequences of hepatitis co-infection on the management of HIV-infected individuals
- Provide insights on novel immunological approaches compatible with clinical drug development
- Develop targeted approaches to improve the pharmacology of antiretroviral agents
- Understand HIV therapy in pediatrics and the aging population

You will leave HIV DART 2010 with a renewed dedication to improve the lives of people infected with HIV/AIDS. We look forward to your participation!
