As Co-chairs of the *XVI International HIV Drug Resistance Workshop: Basic Principles and Clinical Implications*, we invite you to help us build upon the past success of this premier annual meeting on resistance. We are pleased to offer your company the opportunity to support this year's Workshop, which will be held at the Hilton Barbados on June 12-16, 2007.

This HIV Drug Resistance Workshop has gained a reputation over the past 16 years as the premier meeting on drug resistance. Leading laboratory and clinical scientists present their latest research at this Workshop, which often results in innovative approaches to antiretroviral therapy. The Workshop is renowned for the quality of the data presented and the depth of the scientific interaction and debate.

This workshop was designed to interest physicians, clinicians, scientist and clinical researchers in the HIV resistance arena. The educational objectives of this program are as follows:

- Provide and update on resistance to new antiretroviral agents
- Review mechanisms of HIV/HBV/HCV drug resistance
- Present topics specific to HIV/HBV/HCV pathogenesis, fitness and resistance
- Expand the scope of the clinical implications of resistance
- Present new developments in epidemiology
- Introduce new resistance technologies and interpretations

This activity has been planned and implemented in accordance with the Essentials and Standards of the Accreditation Council for Continuing Medical Education (ACCME). The University of California, San Diego is accredited by the ACCME, to provide continuing medical education for physicians. The UCSD OCME will award AMA Category 1 credit to physicians who complete this activity.

In the development and presentation of this program, UCSD will adhere to all rules, regulations, and guidelines of the ACCME, AMA, AAMC, and the FDA governing the conduct of accredited CME activities. All scientific materials presented will be objective and show fair balance as to a range of diagnostic and therapeutic modalities.

HIV Highlights Meetings

Additionally, a modest portion of the total Workshop support may be used towards the HIV Highlights Meetings. These open, one-day meetings overview the most significant findings presented at the Workshop to a broader audience than the Workshop delegates. In addition, a summary of the International Workshop on Clinical Pharmacology of HIV Therapy will also be presented.

On behalf of the Organizing Committee, we would like to ask for your support, which is essential for the success of this Workshop. Informed Horizons, LLC (IHL) will serve as the Secretariat for the *XVI International HIV Drug Resistance Workshop*. Your contribution should be made payable to:

Informed Horizons, LLC
1631 Phoenix Boulevard, Suite 4
College Park GA 30349, USA

If you have any questions, please do not hesitate to contact one of us directly or contact Margie Poole, Secretariat, at +1 770 997 2484 x111. To commit your support, please fax your completed fax-response form to: +1 770 997 2488.

We would like to express our gratitude for your generous support for the *XVI INTERNATIONAL HIV DRUG RESISTANCE WORKSHOP: BASIC PRINCIPLES AND CLINICAL IMPLICATIONS*.

With kind regards,
On behalf of the XVI International HIV Drug Resistance Workshop
